

SolleFlex PI[®]

Vitality in Motion

Bring back your Freedom and Vitality

What if you could always move through your day comfortably, freely and optimistically, even when your activities might normally make you sore, stiff, or even overwhelmed? Even more, what if you could participate in ALL the activities you value most without being limited by joint pain and other structural inflammatory challenges?

At Solle Naturals, we believe you CAN make those positive thoughts a reality. And, we want to give you a little help. It's called SolleFlex PI™, and it has concentrated natural ingredients proven to support prime structural balance and vitality.

So, whether you are running marathons or running down a 2-yr. old, SolleFlex PI™ can help you do it better!

Ingredients – 7 Magnificent Herbs

Chinese Scullcap Extract

This carefully selected extract of Huang Qui is the subject of numerous recent studies which show strong activity in areas of inflammation and pain, in addition to other key factors in daily well-being.

Boswellia Serrata

Often known by its common name, Indian Frankincense, this effective herb is also widely studied for joint inflammation and many other inflammation related health concerns. Its mood-lifting properties make its inclusion in SolleFlex PI® a perfect fit.

Noni Extract

This nutritious fruit contains key compounds that stimulate the immune system and address inflammation, among other issues. Also a source of key vitamins and minerals, noni has become widely used in recent years and has effectively changed the way people see many tropical fruits.

Curcumin (Turmeric)

A powerful spice extract that is a strong anti-oxidant, supports healthy circulation, and is neuro-protective. Its strong activity in colonhealth, and as an important digestive, explain its widespread use in curries and cooking in India. Studies also show that curcumin is a potent anti-inflammatory compound.

Magnolia Bark

One of the oldest known tree species, aromatic Magnolia bark is used in Traditional Chinese Medicine. Its unique polyphenolic compounds are the reason this bark is used in natural anti-stress formulas and formulas for more restful sleep. Health experts agree that it is hard to overstate the importance of adequate sleep in any health program.

Myrrh gum

In traditional Chinese medicine used for inflammation and circulatory support, this tree resin is now increasingly studied for its many other beneficial qualities. Its anti-microbial qualities and its ability to lessen physical discomfort are important reasons for further study.

Grape Seed Extract

Grapes are good, but grape seeds are even better! They contain many compounds, including resveratrol, that fight inflammation and circulatory issues, and bring improved mental clarity. Originally called "vitamin P" by its discoverer, this heavily-studied seed gives broad and proven support for many body-system functions and overall well-being.

The Solle Difference

Most comparable products contain a number of non-plant ingredients. Our 100% Plant-based product is not only uniquely formulated for bioavailability, but also is balanced for our unique approach to the mind-body connection. Our formula also draws more heavily from proven Eastern herbal traditions due to the broad additional benefits of these herbs in well-being and vitality that greatly widen the possible applications of SolleFlex PI.

5 key benefits for SolleFlex[®]

Anti-inflammatory: Encourages a healthy inflammatory response
